THE AERONAUTICAL JOURNAL

OF THE ROYAL AERONAUTICAL SOCIETY

Volume CXII

January-December 2008

Subject Index

ACOUSTICS

Computational aeroacoustics: The low speed jet. E.J. Avital, M. Alonso and V. Supontisky, pp 405-414.

The generation of sound in turbulent motion. G.M. Lilley, pp 381-394.

AERODYNAMICS

2D and 3D low frequency aerodynamics. L.H. van Zyl, pp 609-612.

A circulation control actuator for flapless flight control. M.V. Cook, A. Buonanno and S.D. Erbslöh, pp 483-489.

Aerodynamic load characterisation of a low speed aerofoil using particle image velocimetry. B.W. van Oudheusden, E.W.F. Casimiri and F. Scarano, pp 197-205.

Aircraft gust load estimation due-atmospheric turbulence under different flight conditions. E.N. Abdulwahab and C. Hongquan, pp 345-352.

An investigation into supersonic shallow swept cavity flows. B. Reim, C. Panetta, E. Samanes, S. Gai, J. Milthorpe and H. Kleine, pp 581-592.

Comparison between blade-element models of propellers. Ohad Gur and Aviv Rosen, pp 689-704.

Dimensionless analysis of the unstart boundary for 2D mixed hypersonic inlets. J. Chang, D. Yu, W. Bao and L. Qu, pp 547-555.

Effect of amplitude and mean angle of attack on the boundary layer of an oscillating aerofoil. M. R. Soltani and A. Bakhshalipour, pp 705-714.

Effect of counterflow argon plasma jet on aerodynamic drag of a blunt body at hypersonic Mach numbers. D. Mahapatra, R. Sriram and G. Jagadeesh, pp 683-687.

Experimental investigation on spiked body in hypersonic flow. R. Kalimuthu, R.C. Mehta and E. Rathakrishnan, pp 593-598.

Experimental study of overexpanded co-flowing jets. H. Sharma, A. Vashishtha, E. Rathakrishnan and P. Lovaraju, pp 537-546.

Influence of the height of the vortex generators in the control of shock-induced separation of the boundary layers. G.S. Cohen and F. Motallebi, pp 415-420.

Method for aerodynamic unsteady forces time calculations on an F/A-18 aircraft. D.E. Biskri and R.M. Botez, pp 27-32.

Numerical simulation of rime ice accretions on an aerofoil using an Eulerian method. Y. Cao, Q. Zhang and J Sheridan, pp 243-249.

On the aerodynamics of the Gloster E28/39 – a historical perspective. B.J. Brinkworth, pp 307-326.

Periodic transonic flow and control. S. Raghunathan, J.M. Early, C. Tulita, E. Benard and J. Quest, pp 1-16.

Prediction of laminar, transitional and turbulent flow regimes, based on three-equation k-ω turbulence model. R. Taghavi-Zenouz, M. Salari and M. Etemadi, pp 469-476.

Some features of steady separated flow from low speed-hypersonic (Technical Note). S.L. Gai, pp 109-113.

The 2007 Lanchester Lecture — a summary. p 54.

The role of drag prediction in combat aircraft design and development. J.B. Newton, pp 327-332.

Transitional separation bubbles and unsteady aspects of aerofoil stall. N.D. Sandham, pp 395-404.

AEROELASTICITY

Method for aerodynamic unsteady forces time calculations on an F/A-18 aircraft. D.E. Biskri and R.M. Botez, pp 27-32.

Whirl flutter analysis of prop-rotors using unsteady aerodynamics reduced-order models. M. Gennaretti and L. Greco, pp 233-242.

AEROSPACE ENGINEERING

Conceptual design assessment of a suborbital tourist space access vehicle. B. Chudoba, G. Coleman, X. Huang and P.A. Czysz, pp 523-535.

Linear theory of optimum hot air balloon performance – application-Titan (Technical note). R.D. Lorenz, pp 353-355.

Solid propellants burning enhancement using foil embedding method. H.G. Darabkhanid and N.S. Mehdizadeh, pp 725-740.

AIR TRAFFIC MANAGEMENT

Air traffic safety: Continued evolution or a new paradigm? P. Brooker, pp 333-343.

AIRCRAFT DESIGN

A model for solar powered aircraft preliminary design. E. Rizzo and A. Frediani, pp 57-78.

A timed method for the estimation of aeroplane take-off and landing distances. G.B. Gratton, pp 613-619.

Conceptual design assessment of a suborbital tourist space access vehicle. B. Chudoba, G. Coleman, X. Huang and P.A. Czysz, pp 523-535.

Conceptual design of UAV using Kriging based multi-objective genetic algorithm. S. Rajagopal and R. Ganguli, pp 653-662.

Contrail avoidance in the aircraft design process. F. Noppel and R. Singh, pp 741-737.

Morphing wings. C. Thill, J. Etches, I. Bond, K. Potter and P. Weaver, pp 117-139.

Stability and Control of Aircraft Systems: Introduction-Classical Feedback Control. R. Langton, p 179.
The History of the Theory of Structures: From Arch Analysis-Computational Mechanics. K-E. Kurrer, p 491.
The Superalloys: Fundamentals and Applications. R. C. Reed, p 291.
CFDExperimental and computational investigation into the use of co-flow fluidic thrust vectoring on a small gas turbine. A. Banazadeh, F. Saghafi, M. Ghoreyshi and P. Pilidis, pp 17-25.

COMPOSITES

Active sensing of impact damage in composite sandwich panels by low frequency Lamb waves (Technical Note). C. Soutis and K. Diamanti, pp 279-283.
Morphing wings. C. Thill, J. Etches, I. Bond, K. Potter and P. Weaver, pp 117-139.

COMPUTATIONAL TECHNIQUES

Impacts of low-pressure (LP) compressor's deterioration of a turbofan engine upon fuel-usage of a military aircraft. M. Naeem, pp 33-45.

ENVIRONMENTAL ENGINEERING

Contrail avoidance in the aircraft design process. F. Noppel and R. Singh, pp 741-737.
Systematic review of the impact of emissions from aviation on current and future climate. K. Takeda, A.L. Takeda, J. Bryant and A.J. Clegg, pp 493-522.

FATIGUE

Flight parameter based fatigue analysis approach for a fighter aircraft. J.A. Tikka, pp 79-91.
Indirect aircraft structural monitoring using artificial neural networks. S.C. Reed, pp 251-265.
Monitoring of aircraft landing gear structure. R.K. Schmidt, pp 275-278.
Structural health monitoring systems – benefits and airworthiness issues. P.A. Lloyd, pp 285-289.

FLIGHT CONTROL DYNAMICS

Aircraft gust load estimation due-atmospheric turbulence under different flight conditions. E.N. Abdulwahab and C. Hongquan, pp 345-352.
Analysis of a reversible flight control system response-atmospheric turbulence. K. Raissi, M. Mani, H. Ghaffari and A. Nobari, pp 93-100.
Capturing requirements for tiltrotor handling qualities – case studies in virtual engineering. G.D. Padfield, pp 433-448.
Development of mechanical guidance actuators for a supersonic projectile. K.C. Massey, J. McMichael, T. Warnock and F. Hay, pp 181-195.
Flight mechanics of a free-wing tilt-body aircraft. K. Ro, J.W. Kamman and J.B. Barlow, pp 625-640.
Generic stability and control for aerospace flight vehicle conceptual design. B. Chudoba, G. Coleman, H. Smith and M.V. Cook, pp 293-306.
Helicopter load alleviation using active control. M. Voskuijl, D.J. Walker and B.J. Manimala, pp 663-672.
Lateral-directional controller design using a pilot model and flight simulator experiments. H. Tokutake, J. Fujinaga and Y. Miura, pp 213-218.

FLIGHT SIMULATION

Convergence: commodity flight simulation and the future. K. Takeda, S.J. Newman, J. Kenny and M. Zyskowski, pp 599-607.
Converging towards synthetic environment interoperability. B. Lalonde, pp 171-177.
Interchanging simulation databases with third parties using SEDRIS. R. Harris, pp 207-212.
Simulation interoperability — where are the challenges?. B.N. Tomlinson, pp 153-160.

HISTORY

Balloons, airships and kites – lighter than air: past, present and future. J. Folkes, pp 421-429.
Introduction-the special edition for the 100th anniversary of teaching aeronautics at Queen Mary, pp July iv.
On the aerodynamics of the Gloster E28/39 – a historical perspective. B.J. Brinkworth, pp 307-326.
One hundred years of aeronautics in East London. J.A.D. Ackroyd, L. Bernstein and F.W. Armstrong, pp 357-380.

JETS

Computational aeroacoustics: The low speed jet. E.J. Avital, M. Alonso and V. Supontisky, pp 405-414.
Effect of counterflow argon plasma jet on aerodynamic drag of a blunt body at hypersonic Mach numbers. D. Mahapatra, R. Sriram and G. Jagadeesh, pp 683-687.
Experimental study of overexpanded co-flowing jets. H. Sharma, A. Vashishtha, E. Rathakrishnan and P. Lovaraju, pp 537-546.

LIGHTER THAN AIR

Balloons, airships and kites – lighter than air: past, present and future. J. Folkes, pp 421-429.
Linear theory of optimum hot air balloon performance – application-Titan (Technical note). R.D. Lorenz, pp 353-355.

PROJECTILES

Development of mechanical guidance actuators for a supersonic projectile. K.C. Massey, J. McMichael, T. Warnock and F. Hay, pp 181-195.

PROPULSION

Cold flow analysis of trapped vortex combustor using two equation turbulence models. P. Selvaganesh and S. Vengadesan, pp 569-580.
Distributed parameter control arithmetic for an axisymmetrical dual-mode scramjet. C. Tao, Y. Daren and B. Wen, pp 557-565.
Dynamic performance investigations of a turbojet engine using a cross-application visual oriented platform. K.G. Kyprianidis and A.I. Kalfas, pp 161-169.
Experimental and computational investigation into the use of co-flow fluidic thrust vectoring on a small gas turbine. A. Banazadeh, F. Saghafi, M. Ghoreyshi and P. Pilidis, pp 17-25.
Impacts of low-pressure (LP) compressor's deterioration of a turbofan engine upon fuel-usage of a military aircraft. M. Naeem, pp 33-45.
Performance simulation of a high-bypass turbofan with a 2D representation of the intake and fan components. F.C. Mund and P. Pilidis, pp 673-682.
Technological aspects of gas turbine and fuel cell hybrid systems for aircraft: a review. M. Santin, A. Traverso and A. Massardo, pp 459-467.
Toward an intelligent, deterioration accommodating controller for aging turbofan engines. J.A. Turso and J.S. Litt, pp 641-651.
Whirl flutter analysis of prop-rotors using unsteady aerodynamics reduced-order models. M. Gennaretti and L. Greco, pp 233-242.

ROTORCRAFT

Capturing requirements for tiltrotor handling qualities – case studies in virtual engineering. G.D. Padfield, pp 433-448.
Dynamic inflow modelling for autorotating rotors. Y. Murakami and S.S. Houston, pp 47-53.
Helicopter load alleviation using active control. M. Voskuijl, D.J. Walker and B.J. Manimala, pp 663-672.

SAFETY

Air traffic safety: Continued evolution or a new paradigm?. P. Brooker, pp 333-343.

SIMULATION

Dynamic performance investigations of a turbojet engine using a cross-application visual oriented platform. K.G. Kyprianidis and A.I. Kalfas, pp 161-169.

STRUCTURES

Active sensing of impact damage in composite sandwich panels by low frequency Lamb waves (Technical Note). C. Soutis and K. Diamanti, pp 279-283.
Flight parameter based fatigue analysis approach for a fighter aircraft. J.A. Tikka, pp 79-91.
Genetic optimisation of a neural network damage diagnostic. G. Manson, E. Papatheou and K. Worden, pp 267-274.
Indirect aircraft structural monitoring using artificial neural networks. S.C. Reed, pp 251-265.
Introduction to the structural health monitoring and damage prognosis of metallic and non-metallic structures — special issue, p 250.
Monitoring of aircraft landing gear structure. R.K. Schmidt, pp 275-278.
Morphing wings. C. Thill, J. Etches, I. Bond, K. Potter and P. Weaver, pp 117-139.
Structural health monitoring systems — benefits and airworthiness issues. P.A. Lloyd, pp 285-289.

SYSTEMS

A study of various energy- and exergy-based optimization metrics for the design of high performance aircraft systems. V. Periannan, M.R. von Spakovsky and D.J. Moorhouse, pp 449-458.
Dither-based compensating strategy for radome boresight error and gimbal friction. Y-C Lin, C-L Lin, W-C Shi and S-W Huang, pp 715-724.
System integration of high intensity energy subsystems — a thermal management challenge. D.M. Pratt and D. Moorhouse, pp 477-482.
Toward an intelligent, deterioration accommodating controller for aging turbofan engines. J.A. Turso and J.S. Litt, pp 641-651.
UASA model for solar powered aircraft preliminary design. E. Rizzo and A. Frediani, pp 57-78.
Conceptual design of UAV using Kriging based multi-objective genetic algorithm. S. Rajagopal and R. Ganguli, pp 653-662.

UNSTEADY AERODYNAMICS

A low-Reynolds-number one-equation model of turbulence. M. Elkhoury, pp 101-108.
Aircraft gust load estimation due-atmospheric turbulence under different flight conditions. E.N. Abdulwahab and C. Hongquan, pp 345-352.
Prediction of laminar, transitional and turbulent flow regimes, based on three-equation k-ω turbulence model. R. Taghavi-Zenouz, M. Salari and M. Etemadi, pp 469-476.
Transitional separation bubbles and unsteady aspects of aerofoil stall. N.D. Sandham, pp 395-404.
Whirl flutter analysis of prop-rotors using unsteady aerodynamics reduced-order models. M. Gennaretti and L. Greco, pp 233-242.

WAKES

Some features of steady separated flow from low speed-hypersonic (Technical Note). S.L. Gai, pp 109-113.
